

**FIGURE 3**  
THE INHIBITORY EFFECT OF QUINIDINE ON THE METABOLISM OF 7.5  $\mu$ M OF CP-*A*  
BY HUMAN LIVER MICROSOMES HL-1012

Figure 4  
THE INHIBITORY EFFECT OF QUINIDINE ON CP- A METABOLISM IN HUMAN  
LIVER MICROSOMES HL-1012

\* As the rate of CP- A metabolism of CP- A was linear up to 40 min incubation, the was expressed as  $\mu\text{g CP- A metabolized}/40 \text{ min/nmole P450}$ .

metabolism was linear up to 40 min incubation, the was expressed as  $\mu\text{g CP- A metabolized}/40$
